Thankful

Melissa Maher
Manager

I personally want to thank those members who attended your annual meeting in Eagle Butte back on Oct. 4 and participated in your cooperative business. I must be honest here in saying that I wished more members would have felt the need to attend. I realize the competition for our time – with so many demands in various directions. I just don't want the membership to lose sight of their privilege as owners of their cooperative to take an active role.

Employee Update:

Ethan Aberle was promoted to a Journeyman Linemen status on Oct.1. Ethan originally received a degree from Power Lineman school at Mitchell Tech prior to coming to work at your co-op. Once employed – Ethan was then enrolled in the Northwest Lineman College where he completed tests over a four-year period with a final test taken at the end of each year's course. In addition, he had to document 8,000 hours of service to complete the state requirements. Congratulations Ethan for achieving your Journeyman Certificate. Ethan is an essential member of the team that provides the service we have come to expect.

Jamey Pateneau, McLaughlin area Foreman has resigned his position here with his last day being Nov. 8. Jamey completed twenty years

of service for our members - we certainly wish him and his family the best of luck. Stay tuned for an update as to plans for the McLaughlin outpost.

General capital credit retirements will be applied to your monthly billing statement received in December. The general retirement approved by the board will be \$300,000 for this year. This will complete the balance of 1997, pay 1/3 of 1998 along with a percentage applied to all current rate payers. In addition to general retirement, estate capital credits paid out thus far through October is over \$90,000. Remember, the payment of capital credits is part of the member/owner relationship. By the end of 2023, Moreau-Grand Electric Cooperative will have paid back close to \$10.5 million in capital credits since our inception.

Budget will be at the forefront over the last few months of this calendar year. As we have these discussions, material and equipment supply issues continue to factor into our decisions. Some of our equipment purchases have been carried over several years now – as the availability is that far out.

By the time you are reading this newsletter, the new headquarters building will be closed in for winter construction on the inside. The timeline for completion in May of 2024 looks to be on schedule.

Our first taste of winter arrived the night before I wrote this story – praying that it doesn't last, and we get some reprieve before the real winter shows up.

Until next month..... God's Blessings for this Thanksgiving Season.

LOCATE YOUR ADDRESS

If you locate your address on any of the inside pages of the Moreau-Grand Electric's *Cooperative Connections*, notify us and you will receive a \$25 bill credit. "Eligible addresses will not be on the front or back cover."

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 405 Ninth St., Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living. Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) 865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

October 17, 2023 Board Meeting Minutes and August 2023 Financial Information

The Oct. 17, 2023, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hahne, Hieb, Keckler, Maher, McLellan, Walker and Wall, director absent: Lawrence and others present: Manager Maher, Attorney Burke and Finance Officer Lemburg (Delegated Recorder of Minutes).

President Maher presented Director Hieb with a commemorative plaque for his nine years of service as the Board President.

The Large Power Users monthly report was given by Stephanie Bartlett, which included topics on large power usage and payments.

A discussion was held on what essay prompt the Board would like to use for the Director scholarship. It was the consensus of the Board to use Member Services Director JJ Martin's recommendation of "Why Co-ops are Important" as the essay prompt. Manager Maher shared that JJ is doing a Halloween lineman costume contest for the kids in our service territory, and he has been very active on social media for various things. Director Wall asked if MGEC would like to participate in the Trunk-or-Treat event in Dupree and Manager Maher will relay the information to JJ.

Manager Maher gave the Managers report, which included a new headquarters facility update, Kory Hammerbeck will attend the November Board meeting to give a Rushmore Electric report, Ethan Aberle obtained his Journeyman Lineman certification, GRIP Grants update, renewable energy inquiries, RUS loan update, Basin Electric financials for September, and thank you note.

Darrin Lynch, CFC Representative, introduced himself and announced he will be taking a new position with CFC as a facilitator. He presented a very informative and detailed 2022 Board KRTA report and a 10-year financial forecast for MGEC.

The Board discussed the Legislative Forum scheduled for December 19, 2023, in Faith. Grand Electric will host the forum this year. Directors and Attorney Burke registered to attend.

Erik Sonju, President of Power System Engineering, joined the meeting via Webex, to review the updates made to Policy 10-34 Interconnection of Distributed Generation. Erik's presentation included revision objectives, application form, specifications manual, operating agreement, the revised policy complies with the Public Utility Regulatory Policies Act (PURPA), net-billing, and a high-level comparison to area cooperatives.

Kent gave the Operations Report, which included topics on a planned outage in Dupree, new service updates, Armstrong area outage, tree trimming, Lantry road move, new Badger Park homes, retiring old electrical line in Eagle Butte, and the environmental review is complete on Construction Work Plan Project Code 211. Director Bartlett asked for clarification of an invoice sent for a building move in the Isabel area.

The Board discussed and registered for the NRECA BLC Courses 971.1 "Governance Challenges of the Evolving Distribution Cooperative" and 901.1 "Rules and Procedures for Effective Board & Membership Meetings," which will be held November 28-29, 2023, in Pierre. Directors Hahne, Hieb and Keckler plan to attend.

Manager Maher and Director Hahne will schedule an orientation day, so Director Hahne can meet with the Manager and Staff to learn more about MGEC.

Director Clark gave the SDREA Board meeting report, which included roundtable discussions on renewable energy and SDREA 2024 dues.

Manager Maher gave the SDREA Managers meeting report, which included a legislative update, 811 update, communicating with members, serving as a state legislator, Basin Electric presentation, RUS update, SDREA budget update, roundtable discussions, renewed Mutual Aid Agreement, solar presentation, Mid-West presentation, medical marijuana presentation, and group work retention plan review.

Manager Maher gave the Rushmore Electric Managers meeting report, which included roundtable discussions, reliability campaign, and lobbyists for the upcoming legislative session.

Board approved the following: the agenda, the minutes from the September meeting, the minutes from the organizational meeting, the 2023 annual meeting minutes to be presented to the membership, new members, refunds, line extensions, financial statistics, disbursements, Policy 70-1A Board Committee Appointments, bank signature card resolutions, 2024 SDREA dues, Policy 10-34 Interconnection of Distributed Generation, safety report, Special Equipment Summaries #451-454 in the amount of \$72,490.23, Director McLellan as delegate for the Mid-West annual meeting, and 2023 NRECA dues.

The next board meeting was tentatively scheduled for Nov. 21, 2023, at 8:30 a.m. in the Timber Lake office.

August 2023 Financial Information

	AUG. '23	AUG. '22	YTD 2023
Operating Revenues	\$1,026,840	\$1,120,611	\$8,787,354
Cost Of Power	\$481,400	\$554,012	\$4,091,140
Cost Of Electric Service	\$1,023,704	\$1,128,364	\$8,365,307
Margins	\$34,549	\$21,226	\$570,309
kWh Purchased	8,408,635	9,039,661	74,679,434
kWh Sold	7,688,790	8,846,297	69,379,738

Be Prepared for Winter Driving

Prepare Your Car for Winter

In addition to annual maintenance, here are some tips to winterize your car:

- Test your battery; battery power drops as the temperature drops
- Make sure the cooling system is in good working order
- Have winter tires with a deeper, more flexible tread put on your car
- If using all-season tires, check the tread and replace if less than 2/32 of an inch
- Check the tire pressure; tire pressure drops as the temperature drops
- Check your wiper blades and replace if needed
- Add wiper fluid rated for -30 degrees
- Keep your gas tank at least half full to avoid gas line freeze

Remember to keep your car's emergency preparedness kit fully stocked, too.

Before You Start Out

- Clean your car's external camera lenses and side mirrors
- Remove dirt, ice and snow from sensors to allow the assistive-driving features, like automatic emergency braking, to work
- In frigid weather, you may want to warm up the car before you drive
- To prevent carbon monoxide poisoning, never leave a vehicle running in your garage – even with the garage door up
- If the forecast looks iffy, wait out the storm; if you must travel, share your travel plans and route with someone before you leave

How to Avoid a Crash

AAA offers the following driving tips:

- Avoid using cruise control in wintry conditions
- Steer in the direction of a skid, so when your wheels regain traction, you don't have to overcorrect to stay in your lane
- Accelerate and decelerate slowly
- Increase following distance to 8 to 10 seconds
- If possible, don't stop when going uphill

If visibility is severely limited due to a whiteout, pull off the road to a safe place and do not drive until conditions improve.

Avoid pulling off onto the shoulder unless it is an absolute emergency. Limited visibility means other vehicles can't see yours on the shoulder.

Know Your Car's Capabilities

My Car Does What? is a national campaign to help educate drivers about the safety features built into vehicles. Search for your car and find out what safety features are already built in.

Traction control is now standard on most new vehicles. This function helps your vehicle gain traction on snowy, icy or wet surfaces, particularly when accelerating from a stopped or slowed position, or when trying to make it up a slippery hill.

Anti-lock braking system (ABS) helps you steer in emergencies by restoring traction to your tires and is standard on most new vehicles. ABS may vibrate or pulse when engaged. This is normal. Continue to press and hold pressure to the brake pedal.

Remember, you are your car's best safety feature. Take precautions to ensure you arrive safely at your destination. If you become stranded in an unfamiliar area, do not leave your car. Light flares in front and behind the car and make sure the exhaust pipe is not blocked by snow, mud or objects.

Don't Dig Near Power Lines

Hayes Schomp, Age 10

Hayes Schomp cautions people to be careful where they dig. Hayes is the son of Thad and Devan Schomp from Eklton, S.D., members of Sioux Valley Energy.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

HOLIDAY FAVORITES

OYSTER STEW

Ingredients:

1 qt. medium/large oysters
1 medium onion (diced)
2 qts. half and half
1 can cream of mushroom soup
1 lb. real butter (no cheating here)
3 tbsps. Worcestershire Sauce

Method

Before you know it, Christmas Eve will be here so get ready the traditional Oyster Stew. In a saucepan, saute onions and oysters with the butter. Simmer untill the oysters crinkle. In a crock pot, add half and half, cream of mushroom soup, and Worcestershire Sauce. Then, add the oysters, onion and butter. Season to taste with fresh ground black pepper and salt. Simmer for six hours on low heat (high heat will curdle the milk). Serve with oyster crackers.

Kari Larson- Reder
Warner, S.D.

BETTER THAN CANDY PIE

Ingredients:

1 nine in. chocolate ready crust
1 cup sliced bananas
1/4 cup chopped, dry roasted peanuts
1 small pkg. instant butterscotch pudding
2/3 cup dry milk
1 1/4 cups water
2 tbsps. peanut butter
3/4 cup whipped topping
2 chocolate graham crackers, chopped

Method

Mix together dry milk, pudding, and water with wire whisk. Add peanut butter. Cover bottom of pie crust with bananas. Spread pudding mixture over bananas. Spread whipped topping next. Sprinkle with chopped peanuts and chopped graham crackers.

Janet Ochsner
Box Elder, S.D.

CHRISTMAS CRACK BARK

Ingredients:

1 sleeve saltine crackers, (about 35 crackers)
1 cup unsalted butter
1 cup firmly packed light brown sugar
1/8 tsp. sea salt
1 1/2 tps. pure vanilla extract
1 pkg. (10 - 12 oz.) chocolate chips, semi-sweet, milk or dark chocolate

Method

Preheat oven to 400°F. Line a large baking sheet with parchment paper or foil. Spray lightly with no-stick cooking spray. Arrange crackers on baking sheet in single layer so that the edges almost touch. Heat butter and brown sugar in two-quart saucepan on medium heat. Bring mixture to a boil, stirring frequently. Simmer two to three minutes. Remove from heat; stir in salt and vanilla. Pour caramel sauce over crackers and spread to evenly coat crackers. Bake six minutes. Remove pan from oven. Sprinkle chocolate chips over caramel layer. Let stand five minutes. Spread chocolate chips into an even layer on top of caramel. Refrigerate 2 hours or freeze 30 to 45 minutes or until firm. Break or cut into pieces to serve. Store in an airtight container in the refrigerator up to one week.

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2023. All entries must include your name, mailing address, phone number and cooperative name.

How Energy Efficiency Contributes to a Better Grid

Miranda Boutelle
Efficiency Services
Group

Q: What does “peak energy time” mean, and why should I use less energy at home?

A: “Beat the peak” has become a unified message among South Dakota’s electric cooperatives as the demand for electricity grows year after year. Your electric co-op must deliver around-the-clock electricity to power your life. To understand why it is so important for everyone to use less energy when there is high demand for electricity, known as peak times, let’s start with the complex system that delivers electricity to your home.

The U.S. power grid is often considered one of the largest machines in the world. Some could argue it is our country’s greatest achievement because reliable electricity has become essential to our daily lives and our economy.

The U.S. has three main interconnected power grids: the Eastern Interconnection, the Western Interconnection and the Electric Reliability Council of Texas. Each interconnection has regional balancing authorities, which are organizations that ensure electricity supply constantly matches electricity demand.

The interconnections are powered by electric generation in various sources, including hydropower, nuclear, coal, gas, wind, solar and more. Some of these generation sources can supply power constantly or be ramped up or down depending on demand, while others supply intermittent power. The energy produced by these sources connects to the grid and moves along transmission lines that allow power to travel long distances.

Your electric co-op is known as a distribution utility, which operates the power infrastructure connecting transmission lines to the distribution power lines that bring electricity to your home.

This whole system and the more than 2 million people who operate it are continually working behind the scenes so we can take advantage of a 24/7 supply of electricity at the flip of a switch.

Throughout the day, demand for power supply

fluctuates. If supply and demand fall out of balance, local or widespread blackouts can occur. To maintain reliable power, especially during peak times, there must be enough power supply to equal demand.

Due to supply and demand, the cost to buy power is higher during peak times. Peak times vary across the country but are typically in the morning as we start our day and, in the evening, when we return home.

The demand for power increases every year. The U.S. Energy Information Administration projects residential consumption of purchased electricity will increase between about 14% and 22% from 2022 to 2050. Industrial, transportation and commercial consumption is also projected to experience increased demand.

As generation, transmission and distribution utilities work to increase production and maintain and protect our grid, it’s important for all of us to take steps to use less energy every day. In turn, it will help you save on your monthly electric bill.

To beat the peak, think about how you can use less energy in the morning and evening. Start with the area that uses the most energy by adjusting your thermostat during peak hours, either up or down a few degrees depending on the season. A smart thermostat can do this for you automatically.

Are there certain appliances or devices you can wait to run until after peak hours? For example, start the dishwasher or dryer before you go to bed. If you have an electric vehicle, program it to charge overnight instead of right when you return home in the evening. Smart power strips ensure your devices are not pulling power when they are turned off. These devices work well for TVs and gaming devices.

If you have appliances that are 10+ years old, consider replacing them with new, efficient ENERGY STAR®-rated appliances. Your electric cooperative may have rebates to help lower the initial cost.

By embracing energy conservation, we can all make small changes that have a big impact on our community and the intricate system that powers our lives. To learn more about your local peak times and how you can use less energy, contact your electric co-op.

Miss South Dakota

Shannon Marvel

shannon.marvel@sdrea.coop

Six years ago, Miranda Orth O'Bryan had just finished her first year at South Dakota State University when she set her eyes on the Miss South Dakota crown.

Her good friend and reigning Miss SDSU at the time – Miranda Mack – had just been crowned Miss South Dakota 2017.

It inspired her to throw her own hat into the ring.

Soon after, O'Bryan realized it was so much more than a beauty pageant.

"The moment that I set foot on my first local competition stage I was hooked," O'Bryan said.

"I didn't even realize at that point what it would mean to be Miss South Dakota, and over the years I realized how impactful it is to have that platform."

O'Bryan was crowned Miss South Dakota 2023 last June.

According to the organization's website, the Miss America opportunity has evolved over the years to better serve the women involved in the program and the communities in which they live.

"Throughout the competition and in interviews, delegates have the opportunity to connect with the judges, showcase their community service initiatives, and demonstrate how they are uniquely qualified for the exciting 365-day opportunity of being Miss America," the website reads.

The 25-year-old Martin native knows a thing or two about community leadership and the importance of community service.

That's because she grew up in a rural co-op family.

Her grandpa is Wayne Sterkel, who served as general manager for Lacreek Electric Association, Inc. from 1982 through 2017.

Her membership with the cooperative began before she was even born.

According to O'Bryan, her mother's baby shower celebration was hosted right in the co-op's conference room.

Her parents, Mikaela and Chris O'Bryan, would gather at the co-op's headquarters in Martin for many special occasions

throughout the years.

"We'd go to the annual meeting every year. That's what built me up and gave me opportunity," O'Bryan said. "It's important. A lot of people may not understand. They say, 'Why they'd ever need to go to a rural electric cooperative meeting?' But that's your opportunity to connect with the people who keep your lights on and your community."

O'Bryan was also in the group of high school students who visited Washington, D.C. through the South Dakota Rural Electric Youth Tour. She also won a \$1,000 scholarship to attend South Dakota State University through the Lacreek Electric scholarship program.

"Without seeing that those opportunities were there, I would've never thought about pursuing greater ones down the road," O'Bryan said.

Growing up, O'Bryan was heavily supported by the community services within the small, rural community of Bennett County, especially the public library.

O'Bryan said her mother had her at a young age and during her childhood, money was tight.

She fondly recalls spending countless hours at the public library in Martin with her grandmother while her parents were at work.

The library became an invaluable resource for O'Bryan.

So as part of her community service initiative as Miss South Dakota, she's doing what she can to highlight, support and enhance reading resources so more children have access to the same opportunities as she did.

"Reading has always played a significant role in my life. Growing up with a single mom who was attending college, living on Medicaid, and in free/reduced housing meant I might not always get the new Barbie I wanted, but a book was never turned down," O'Bryan wrote in her blog.

"I spent my nights living in a crime-stricken neighborhood bonding with my

mom and adoptive dad over tales of far-off lands and grand adventures. As a young girl on the Pine Ridge Reservation, I spent my time reading in my mom's classroom and my grandma's library in Martin, engulfed in as many books as I could get my hands on."

She hit the ground running after winning the state crown, launching a successful reading initiative which put 10,000 books in school libraries statewide.

She's the published author of a children's book, *Jericho the Journalism Kitty*.

She founded Page Turners: Fall in Love with Reading, a program that encourages children to read.

Building a foundation for children to access literature regardless of their household income or location was the first step.

Now she's working with youth throughout the state and making visits to classrooms in an effort to spark a love of reading within their young minds.

O'Bryan shares with classrooms how reading influenced her success and showing just how powerful literacy is in personal development.

"I see it happening – people are finding that passion. Reading is a foundation for everything in life," O'Bryan said.

She firmly believes and serves as living proof that it's not where you started that determines your future successes.

"It's where you're going," she said.

And during the first week of January, O'Bryan is going to Orlando, Fla. To compete against 50 other women for the Miss America crown.

The Miss America Pageant is slated for Jan. 6-14 at the Walt Disney Theater in the Dr. Phillips Center for Performing Arts.

BRINGING THE LIGHT

Electric Cooperatives Spread Holiday Cheer

Frank Turner

frank.turner@sdrea.coop

While Santa's elves are hard at work at the North Pole, South Dakota's electric cooperatives are working to bring their own magic to their local neighborhoods, illuminating local parades with festive lights. Black Hills Electric Cooperative is just one of many examples of how a co-op can not only bring light but also creativity to their community.

Every December, Black Hills Electric crafts an exceptional float for the annual Custer Parade of Lights. For Bill Brisk, the manager of operations at Black Hills Electric, the parade isn't merely an event – it's a cherished tradition for their co-op.

As the parade approaches, the Black Hills Electric workshop bustles with

activity, mirroring Santa's very own workshop. Guided by a design from Brisk, linemen and staff assemble their unique Christmas float – crafting, welding and fabricating many of their designs from scratch.

"Just a few nights before the parade, we host a family night where we bring out the families of our employees,"

said Brisk. “The co-op provides food and drinks and we all work together to finish the float.”

In just two weeks, the co-op repurposes discarded equipment and scrap parts into creative masterpieces. One year, the co-op created an oversized shopping cart from old pipe laying around the shop. The next, they used retired meter loop pipes, guy wires, and meter covers to create palm trees and coconuts for a beachside Santa scene. Even Willie Wirehand, the co-op’s safety mascot, has been outfitted for a festive float. Despite being fabricated from old parts, the end result is always something worthy of a debut at the North Pole.

“Most everything we do is built in our shop,” said Brisk. “We do all

of the fabrications ourselves, and we haven’t had a flop yet.”

Luckily, the co-op’s efforts haven’t gone unnoticed. Since 2015, they’ve clinched an award every year at the Custer Parade with the only exceptions being 2020 and 2021 when the pandemic halted festivities. Their trophy collection holds a wide range of awards, boasting awards like the Rudolph’s Choice Award, Best Light, Best Music and most recently, the Custer Fruit Cake Award.

Dawn Murray, the executive director of the Custer Chamber of Commerce, expressed her admiration. “They really go all out. Beyond the parade, they even participate in our scarecrow decorating contest. I remember one year they had a scarecrow up in a

bucket truck, which was really cool.”

Yet, for Black Hills Electric, Custer is just the beginning. The co-op has grand visions for a broader festive footprint. With a service area that stretches from just south of Terry Peak to Nebraska, Brisk sees even more opportunities to shower communities with holiday cheer.

“It’s a festive time of year and something that we want to extend out to different towns in our service territory,” said Brisk. “Seeing the kids’ eyes brighten when we light up our float for the first time really makes the whole thing worth it, and if we can spread that to more of our members, all the better.”

'Tis the Season

JJ Martin

Member Services
and IT Director

As the temps drop, we fill our hearts with fellowship and family time. We gather with our extended families for Thanksgiving and Christmas because that is what matters most. Even my six-year-old says her favorite part of Christmas is family (mostly her cousins).

The delicious smells in the kitchen, the gifts under the tree, and the fuel we burn to heat our homes and get where we are going all weigh heavily on our budgets. Especially during times of seemingly never-ending inflation, we look to tighten our belts to afford our kids the holiday season we want them to have.

There are myriad ways to save money around the house to help cushion the holiday expenses. Here are a few:

- Switch to LED bulbs
- Seal gaps with caulk or foam sealant

- Unplug unused devices and appliances
- Lower your thermostat by a degree or two

Check out “101 ways to save” on our website at www.mge.coop/101-ways-save-energy-money or call JJ at 605-865-3511 to get a copy and see 97 more ways to save energy.

Signing up for SmartHub and downloading the app gives our members the ability to track their usage daily, weekly, and monthly. It allows them to see how effectively they are saving energy in near real-time. We also offer leveled billing, which can alleviate the winter crunch, especially for the members who have electric heat!

I find it on my heart this year to include the fact that the holidays are the most difficult times for many. If you are struggling with your mental health, know that you are loved and you matter. You can find mental health support at sdsuicideprevention.org and 988lifeline.org or call the 988 hotline. 10694 224TH AVE McIntosh, SD 57645

May God bless all our members this holiday season.

Need Cash for College?

Moreau-Grand Has Four Opportunities!

Moreau-Grand Electric believes that by sponsoring youth programs we are investing in tomorrow's leaders. You can help by encouraging future leaders to apply.

Applications are available at <https://www.mge.coop/scholarships> or at our offices in Timber Lake or Eagle Butte and with your school counselor.

Director's Scholarship

Our directors donate a portion of their compensation to a scholarship fund. This year, the scholarship will be awarded to an applicant who plans to pursue any post-secondary degree. The scholarship is in the amount of \$2,500. The deadline to apply for this opportunity is Feb. 19, 2024.

Basin/Moreau-Grand Scholarship

Each year Moreau-Grand Electric offers a \$1,000 scholarship to one area student, chosen by our power supplier, Basin Electric Cooperative. The deadline to apply for this opportunity is Feb. 19, 2024.

Resource Conservation Speech Contest

Each year the South Dakota Department of Agriculture, Resource Conservation and Forestry Division sponsors

a resource conservation-oriented speech contest. Any South Dakota student in grades 9-12 is eligible to enter. This includes public, private, and home-school students.

- First Place: \$1,200 Scholarship
- Second Place: \$800 Scholarship
- Third Place: \$500 Scholarship

The contest is sponsored by the Touchstone Energy Cooperatives of South Dakota. The deadline to apply for this opportunity is March 9, 2024.

South Dakota Association of Cooperatives Scholarship

SDAC is awarding two \$1,000 scholarships to second-year higher-education students who are pursuing a degree relative to the cooperative business and who are members or whose parents/guardians are members of a SDAC member cooperative including Moreau-Grand Electric. Application deadline is Dec. 5, 2023.

Moreau-Grand Electric Cooperative Returns \$300,000 in Capital Credits to Members

Credit on My Bill?

Yes, that is the cooperative difference! Unlike other electric utilities, Moreau-Grand Electric exists to make sure your needs are always met, not to make a profit. As a member-owner, you share in the margins in the form of capital credit refunds. The cooperative works hard every day to keep your rates as low as possible, but it's sure nice to know that when there are credits, they go back to you.

How much has been returned to its members since the founding of the cooperative in 1946?

Including this year's capital credit refund, members have received \$10.5 million.

How much is the 2023 capital credit refund?

The general retirement approved by the board will be \$300,000. This will be applied to your billing statement received in December.

How is the amount given to each member decided?

These credits are based on the amount and cost of electricity each member purchased during the year or years being retired.

Why aren't the allocations paid out all at one time?

One of the basic cooperative principles is that members participate in the financial well-being of the cooperative through their economic participation. Members are the owners of the cooperative, and the cooperative uses payments received from members to build and maintain the reliability of the electric system. When finances permit, margins are periodically returned to the membership.

REED FUND

Powering Your Community

Shannon Marvel

shannon.marvel@sdrea.coop

The community development financial institution powered by rural electric cooperatives in South Dakota is about to reach a major milestone.

The (Rural Electric Economic Development) Fund's total dollar amount in projects impacted is anticipated to reach \$1 billion by the end of 2023, according to Eric Fosheim, Economic Development Manager for REED.

REED also exceeded 10,000 in jobs impacted (created or retained) since its creation in 1996.

"Currently, we sit at just over \$998 million in total projects impacted," Fosheim said in October.

The REED Fund is a 501(c)3

corporation and operates as a revolving loan fund that provides financing for economic development projects in rural areas.

Those projects that receive REED Fund dollars must promote growth and be a catalyst in creating more business, wealth and job opportunities within the rural community. The projects are also expected to improve infrastructure and economic base in rural areas.

The REED Fund provides financing from the federal government and other lender, in addition to revolving interest payments collected over the years. The REED Fund does not use money generated by electric rate charges.

Fosheim said that as of September 30, REED has issued 401 loans for a total of \$125.26 million.

"This includes \$104,174,418 in loans made using REED dollars and \$21,082,793 from the USDA Rural Economic Development Loan and Grant program," Fosheim said.

Central Electric General Manager Ken Schlimgen, left, delivers REED funding to Mitchell Technical College.

Fosheim said it isn't entirely surprising that the \$1 billion was hit this year.

"REED has seen steady growth over the years, but typically sees higher than normal application volume in times of rising interest rates. In addition, costs are rising as well, so total project costs for each individual project have been higher as well.

Dakota Energy General Manager Chad Felderman has been on the REED Fund board since 2018.

He said the impact the REED Fund has on local communities is unique, noting that the businesses the fund helps aren't necessarily ones that Dakota Energy provides electricity to, but are ones that help our communities, "which in turn helps our members where they live," he said.

"It is gratifying to help our hospitals, fire departments, and schools purchase equipment so our small communities can provide those essential services," Felderman said.

One of those projects funded by REED is the Huron Regional Medical Center dialysis building.

"We are proud to support HRMC in sustaining and expanding local access to critical medical services right here in our community," Felderman said.

Douglas Electric Cooperative General Manager Jay Spaans echoed Felderman's sentiment, noting that the REED Fund is special because co-ops get to loan money to businesses that they don't always serve.

"For us, it is just about making

improvements in the community. Sure, we would like to serve the load, but even if the new load doesn't reside in our territory, we still will fund the loan," Spaans said. "It is all about the greater good for our communities."

West River Electric CEO Dick Johnson also serves on the REED Fund board. He's one of the first board members to represent a co-op in the western part of the state. The REED Fund was originally set up by co-ops in eastern South Dakota. After two decades of successful growth and development, the REED Fund decided to allow co-ops in western South Dakota to join in 2017. Johnson said West River Electric was one of the first western co-ops to be accepted into the REED Fund.

"It was one of the best things we could ask for. We were struggling with our own revolving loan fund but we had primarily loaned to government entities, no businesses," Johnson said.

"When we became members of REED that gave us another tool in our toolbox to offer our members who were interested in our area or needed to expand their businesses or infrastructure."

West River Electric hasn't had many loans, but Johnson is still encouraged by what he's seen as a board member.

"Sitting on the Board and seeing the applications and the impact we are having on the economy of small towns all over South Dakota is phenomenal," Johnson said.

Johnson had high praise for the folks at the REED Fund office in Madison, calling

them a "class act" who really understand the region's rural areas.

"They work hard to say yes and somehow make it work. The fact that the local co-op board can help make the decision to move a project forward is unheard of – real boots on the ground who are in the communities we serve and understand what is needed to thrive," Johnson said. "It is a unique model just like the cooperative business model."

Did You Know

From 2018 to 2022, electric cooperatives in South Dakota spent \$5.7 Billion on capital investment, operations, and maintenance activities and retired \$102.8 Million in capital credits paid to consumer-members.

Through these expenditures, co-ops drive economic benefits in their local communities and throughout the state.

Over the five-year period, electric co-ops in South Dakota are responsible for:

STATEWIDE IMPACT

- \$4.2 Billion to South Dakota's Gross State Product (GSP)
- An average of 5,848 jobs in South Dakota each year
- \$2 Billion in labor income in South Dakota
- \$194.1 Million in federal taxes
- \$423 Million in state taxes
- \$418.4 Million in local taxes

All of these impacts occur in counties where electric cooperatives operate, showcasing the substantial local economic benefits that co-ops provide in the communities they serve.

Cameras give producers the opportunity to monitor one of the ranch's most valuable assets: cows!

BOVINE BABY MONITORS

Local Producers Blend Tradition with Innovation

Frank Turner

frank.turner@sdrea.coop

Just as parents rely on baby monitors to keep an eye on their sleeping infants, ranchers across South Dakota are embracing advanced camera systems to protect their prized newborn calves. These bovine baby monitors offer a crucial safeguard, ensuring the safety of one of the ranch's most valuable assets.

Producers Logan and Layton Hendrickson, hailing from Meadow, S.D., represent the sixth generation of their family's operation in farming and ranching in South Dakota. The

surveillance technology utilized by Logan and his family, however, is a far cry from the farming practices of Logan's great-great-great-grandfather, Franz Seidel, who at the unlikely age of 56, established their farmstead in 1907 after fleeing from unsettled times in Russia. Despite a legacy spanning over a century, the Hendrickson and Seidel family operation proves that even a long-standing operation can embrace new technologies and modern solutions.

"Our farm has been passed down through the generations, and we have been building on it ever since, like Lego bricks," said Logan.

Recent winters marked by challenging weather and significant snowfall have emphasized the role of cameras during the calving season. After all, it doesn't matter whether the sun is shining or a blizzard is rolling in, nature persists. Beyond staying warm, these cameras offer producers a less invasive method of observing their cattle, reducing the amount of stress put on cow and calf pairing. Installed in their barn, the Hendrickson's camera system streams live video of the cows straight to

The Hendrickson family uses a camera to keep an eye on their cattle during the calving season.

The Hendrickson-Seidel ranch is a sixth-generation operation in northwest South Dakota.

a cellphone, often without the cows ever knowing.

“We aren’t in their space, disrupting their natural habits,” he said. “All we have to do is pull out our phones and we know what is going on.”

In addition to convenience, cameras can also help producers catch complications that arise following the calving process. For instance, accessible oversight can allow a producer to prevent an unruly cow from unintentionally harming their newborn calf. The result is a better operational efficiency, fostering a more relaxed environment during an otherwise stressful time and creating better outcomes for both the calf and mother.

“It doesn’t take long for these systems to pay for themselves,” said Logan. “And at the end of the day, it creates a more comfortable experience for the cow and calf during a very stressful time.”

The development of technology on the Hendrickson-Seidel ranch isn’t just limited to cameras. Their family operation like other operations across the state has seen development in nearly every aspect of their operation through the generations.

“It’s not technology in the sense of having the latest electronics but technology in the sense of development,” said Logan. “My great grandfather went from using a 20-horsepower tractor with steel tracks at the beginning of his career

to using a 400-horsepower tractor with auto-steer and air conditioning.”

Whether it’s record-keeping on your cellphone or using advanced technologies like GPS guidance, Logan said his family has utilized new technologies in a way that has kept their operation competitive and relevant for over a hundred years, proving the old myth, “you can’t teach an old dog new tricks,” simply isn’t true.

“One of the first people to adopt a new technology on the farm is my grandfather,” said Logan. “He is the person pushing to new innovations because he sees the economic benefit long before any of us do.”
