November 2019 Board Minutes and September 2019 Financial Information

The Nov. 19, 2019, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hieb, Keckler, Landis, Lawrence, Maher, McLellan, Walker and Wall, and others present: Manager Maher, Finance Officer Dahlgren (delegated recorder of minutes) and Rushmore Electric Manager Vic Simmons.

- The large power users monthly report was given by Sue Sherwood, which included topics on large power usage and payments.
- The member services report was given by Roger Lawien, which included successful completion of credit card security scan and assessment, annual meeting statistics, SDREA Metering Workshop, Rushmore Member Services Group budget meeting, Basin Electric scholarship packets, website redesign and budget.
- The operations report was given by Kent Larson, which included pole changes, results of substation oil and infrared testing, new services, locates and will be sending linemen to SDREA Metering and URD schools.
- Manager Maher gave the manager's report that included NRECA Partnership Agreement Committee which Finance Officer Dahlgren will be a member, SB66 hearing update, WAPA contracts, Basin Electric capital credits, load management, Basin Electric YTD financials, collections, general capital credit retirement, BLC confirmations, Rushmore board minutes, CFC

September 2019 Financial Information			
	September 2019	September 2018	YTD 2019
Operating Revenues	\$908,055	\$828,966	\$9,419,065
Cost of Power	\$393,126	\$437,576	\$4,634,704
Cost of Electric Service	\$926,031	\$874,045	\$9,169,971
Margins	\$51,527	\$(31,104)	\$399,187
kWh Purchased	7,004,486	6,999,024	82,130,956
kWh Sold	6,670,316	5,986,562	75,311,471

- board minutes and WAPA drought adder will remain at zero.
- The board reviewed outside consultant contracts for 2020.
 - Vic Simmons made his annual visit to MGEC and gave the following report that included the departments within Rushmore, WAPA, annual runoff, drought adder, Midwest Electric Consumers Assn., Western States Power Corp, Basin Electric generation capability, energy portfolio, financials, DGC and FERC regulation.
 - Management and staff presented the 2020 preliminary budget and work plan to the board.
 - The board discussed and registered for the SDREA annual meeting scheduled for Jan. 16-17, 2020, in Pierre, S.D.
 - The board discussed the NRECA annual meeting scheduled for March 1-4, 2020, in New Orleans and there wasn't any interest among the board to attend.
 - Director Lawrence gave the Rushmore board meeting report that included a financial report, renewable energy credits, load control, approved 2020 rates, budget and work plan, annual meeting, manager report, runoff, Basin Electric financial report and member cooperative issues.
 - Director Clark gave the Basin Electric annual meeting report that included industry updates given by Basin Electric employees and board members, Bismarck/Mandan musical entertainment and N.D. Governor Burgum presentation on energy revolution and diversity.
 - The board approved the following: the agenda, the minutes from the October meeting, new members, refunds, line extensions, financial statistics, disbursements, safety report, outside consultant contracts for 2020, the 2020 preliminary budget, employee Christmas bonus and Director Landis as the delegate and Director Wall as the alternate for the SDREA annual meeting.
 - The next board meeting was tentatively scheduled for Dec. 17, 2019, at 8:30 a.m. in the Timber Lake office.

Comparative Report	Current (Oct. 2019)	1 year ago (Oct. 2018)	10 Years Ago (Oct. 2009)	% Change in 10 years

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 405 Ninth St., Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) 865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Capital Credits To Be Retired

Melissa Maher

melissa@mge.coop

I'm writing this report during the Thanksgiving holiday – with a major storm looming over us. I pray the Good Lord will spare us and keep everyone safe. With this in mind, let's truly give thanks for all of our blessings and consciously make a list of things we are thankful for.

When speaking of thankful – how about the capital credit you received on your December billing statement from Moreau-Grand Electric Cooperative? We chose to apply the credit to your account to avoid check printing/postal costs and employee time reconciling the bank account and contacting members who do not cash their checks. Checks will be mailed to inactive members who no longer receive a monthly statement.

How many places do you do business with that actually pays you money back to do business with them? I fear that we may have become complacent about this gift and worse yet, may not even realize it if we don't review our billing statement carefully. We have dedicated space in this newsletter to bring attention to the topic of capital credits.

I don't take paying of capital credits lightly – it is necessary to comply with our member-owned relationship. Moreau-Grand Electric is owned by the membership – so by having a meter in your name makes you part owner of your cooperative. The difference between revenues and expense in a cooperative world are referred to as margins. Until they are paid back to the members, capital credits represent operating capital or equity provided by the members to the cooperative. This capital is one source of equity and operating funds for your cooperative to secure loans, maintain facilities and expand our system to meet the demands of our steadily growing membership. These margins are then eventually paid back to the membership in the form of capital credits based on the amount of electricity you purchased. This year's general retirement of \$300,000 will bring total capital credits paid since Moreau-Grand's inception to more than \$8.3 million.

Employees are looking ahead to 2020: Budget for 2020 looks to keep rates stable with plans on attending to needed maintenance of our existing plant. We also have plans in the budget for a new warehouse in Timber Lake along with a new equipment building in Eagle Butte. Another big item on the budget is completion of a 500 MCM underground line around Eagle Butte with the last leg of this project connecting our Sioux Substation to the Eagle Butte Substation along Highway 212.

Physical inventory is scheduled for year-end with hopes for shutting down construction the last week of the year to accommodate the process.

Thanks to all the members for your contribution to another successful year at your co-op.

Wishing all a Blessed Christmas Season...Remember, Jesus is the Reason for the Season!

Winter Electrical Safety Tips

In South Dakota and western Minnesota, December through March is a particularly hazardous time of year for storms and electrical power outages. Heavy snow, ice and wind can ravage power lines, both on the main power grid and at home. Add to that the increased use of home heating equipment such as space heaters and electric blankets and the potential for dangerous electrical hazards and home fires only intensifies.

Keep your home and loved ones safe this season by following these important winter electrical safety tips:

- **Use space heaters safely.** Keep them a minimum of three feet from furniture, bedspreads, drapes or clothes and never leave them unattended when they're on. Don't use extension cords with your space heaters and always unplug the heaters when they're not in use. Keep space heaters away from wet or damp areas and never touch a heater when your body is wet.
- **Use caution with electric blankets.** Never use an electric blanket while you're sleeping. Make sure the plug and cord are in good shape; otherwise it can pose a fire hazard. Be sure to dispose of electric blankets that have worn or damaged areas.
- **Be careful with your kitchen appliances.** While crockpots and other slow-cooking devices get a lot of use in the winter, you should never leave them turned on when no one is home. Leaving them unattended is a major fire risk. And be sure to check electrical kitchen appliances for frayed or damaged cords and plugs before use.
- **Make sure your home is equipped with functioning carbon monoxide detectors.** Carbon monoxide (CO) is an odorless gas that kills at high concentrations and causes serious and irreversible injuries at lower levels. Deaths from carbon monoxide poisoning increase during the winter months due to the use of common fuels like natural gas, wood and coal. Installing an inexpensive carbon monoxide detector can save your family's life.
- **Are your smoke alarms in working order?** It's important to make sure that you have an adequate number of smoke alarms throughout your home and that they are functioning properly. Simply push the test button to make sure it beeps and replace the batteries if needed.
- **Don't overload circuits or wattage.** Despite the shorter, darker days of winter, don't go above the recommended wattage for your light fixtures. Don't overload wall outlets either and only plug three-prong cords into three-prong outlets. Use extension cords sparingly and only for temporary purposes.
- **Have your home's electrical panel inspected by a licensed electrician.** Because electric usage goes up significantly in winter, you may need an upgrade in order to meet this increased demand.
- **Keep outdoor outlets closed.** Check your outdoor outlets regularly to ensure that they don't have an accumulation of ice and snow on them. Keep them cleared off and closed to avoid moisture from invading the receptacle box and causing an outage.

ELECTION DAY NOVEMBER 3, 2020

KIDS CORNER SAFETY POSTER

"Don't fish near overhead power lines"

Lily Gums, 14 years old

Lily is the daughter of Dave and Kathy Gums, Clear Lake, S.D. They are members of H-D Electric Cooperative, Clear Lake.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Super Soups

Leftover Turkey Chowder

4 slices bacon, chopped	1/4 cup flour
1/2 cup chopped onion	2 cups half-and-half
2 cups water	2 cups cubed cooked turkey
4 medium red potatoes, cut in 1/2-inch cubes (about 2 cups)	1 (8 3/4 oz.) can whole kernel corn, undrained
1 pkg. McCormick® Turkey Gravy Mix	1 tsp. McCormick® Sage, Rubbed

Cook bacon in large saucepan on medium heat until crisp. Add onion; cook and stir 3 minutes. Add water and potatoes. Bring to boil. Reduce heat to low; cover and simmer 5 minutes or until potatoes are tender. Stir gravy mix and flour in medium bowl. Stir in half-and-half with wire whisk until smooth. Stir mixture into saucepan. Add turkey, corn and sage. Bring to boil on medium heat. Reduce heat to low; cover and simmer 10 minutes, stirring occasionally. Makes 8 (1 cup) servings.

Nutritional Information Per Serving: Calories 258, Fiber 1g, Protein 16g, Cholesterol 68mg, Total Fat 14g, Sodium 427mg, Carbohydrates 17g

Pictured, Cooperative Connections

Crockpot Potato Soup

1 (30 oz.) bag hash browns	1/2 cup chopped onion
3 (14 oz.) cans chicken broth	1/4 tsp. pepper
1 can cream of chicken soup	1 (8 oz.) pkg. cream cheese

Combine first 5 ingredients in crockpot. Cook on LOW 6 to 8 hours. Add cream cheese 1 hour before serving.

Bonnie Weber, Aberdeen, SD

Taco Soup

1 lb. ground beef, browned and drained	1 (10.75 oz.) can tomato soup
1 can chili beans, undrained	1 soup can water
1 pkg. taco seasoning	Tomato juice

Combine all ingredients; heat through. Serve with shredded cheese, corn chips or crackers if desired.

Velma Schmitz, Bonesteel, SD

Curried Pumpkin Soup

8 oz. sliced fresh or canned mushrooms	1 (15 oz.) can pumpkin
1/2 cup chopped onion	1 (12 oz.) can evaporated milk
2 T. butter	2 T. honey
2 T. flour	1/4 tsp. ground nutmeg
1 tsp. curry powder	Salt and pepper
3 cups vegetable broth	

In a large saucepan, saute mushrooms and onions in butter until tender. Stir in flour and curry powder until blended. Gradually add broth. Bring to a boil; cook and stir 2 minutes or until thickened. Add pumpkin, milk, honey, nutmeg, salt and pepper. Heat through.

White Tail Ridge Bed & Breakfast, Hermosa, SD

Cheddar-Ham Chowder

2 cups water	1/4 cup butter
2 cups cubed potatoes	1/4 cup flour
1/2 cup sliced carrots	2 cups milk
1/2 cup sliced celery	2 cups shredded Cheddar cheese
1/4 cup chopped onion	1 (16 oz.) can corn, drained
1 tsp. salt	1-1/2 cups cubed, cooked ham
1/4 tsp. pepper	

In a large saucepan, bring first 7 ingredients to a boil; reduce heat. Cover and simmer for 8 to 10 minutes or until vegetables are just tender; remove from heat but do not drain. Meanwhile, in a medium saucepan, melt butter and blend in flour. Add milk all at once, cooking and stirring until thickened and bubbly. Add cheese, stirring until melted. Stir into undrained vegetable mixture. Return large saucepan to heat; add corn and ham. Heat through, stirring occasionally.

Diane Fode, Rapid City, SD

Please send your favorite brunch, seafood or appetizer/beverage recipes to your local electric cooperative (address found on Page 3).

Each recipe printed will be entered into a drawing for a prize in June 2020. All entries must include your name, mailing address, telephone number and cooperative name.

Start the New Year Right with Energy Savings

Pat Keegan

Collaborative Efficiency

Here are energy-saving measures you can do right away and some for later.

Taking some of these easy steps now should provide some quick energy savings. To save even more, you'll need a plan that includes the "later" steps we've shared here. An energy audit can help you determine a much better plan and your electric co-op may be able to provide an audit or recommend a qualified local auditor.

This column was co-written by Pat Keegan and Brad Thiessen of Collaborative Efficiency. For more information, please visit: www.collaborativeefficiency.com/energytips.

Dear Pat and Brad: My neighbor claims they were able to cut their energy bills nearly in half. Is that even possible? What would I have to do to get there? It sounds like it would take a lot of time and money. – Luke

Dear Luke: The story you heard is not far-fetched. We've been involved with energy efficiency programs that have achieved those kinds of results. Let's talk about some energy-saving measures you can do right away and how you plan for greater savings down the road.

Dial in savings.

Now: The first place to start is your home thermostat. In most homes, the largest portion of the energy bill goes toward heating and cooling. Setting back your thermostat by 7 degrees to 10 degrees for eight hours a day can save you up to 10 percent a year on heating and cooling. In the winter, you could aim for 56° F at night and when no one is at home and 68° F when you're up and around. If you're used to a warmer house, it may mean throwing on a sweater or pair of slippers. It should be noted this tactic is not as effective for some homes with radiant heat systems.

Later: Make sure to adjust your air conditioning settings next summer. If you have a manual thermostat and don't always remember to adjust it, consider purchasing a smart thermostat or at least one that's programmable.

Set refrigerator and freezer temps for efficiency.

Now: Make sure your refrigerator and freezer aren't set to a colder temperature than needed. The fridge should be at 38° F to 40° F and the freezer compartment should be 5° F. If you have a separate chest freezer, set it to 0° F. Also check your water heater setting. You should aim for a setting of 120° F.

Later: Old refrigerators and freezers can use a lot of electricity. If yours was made before 1993, you can save upwards of \$65 a year with a new ENERGY STAR® model. If you eliminate a second refrigerator or freezer, you can save even more, especially if they are stored in your garage.

Maximize the heat you've got.

Now: Look around each room and make sure the vents and radiators aren't blocked by furniture or other objects. If the floors feel cold even when the room is warm, put down area rugs for additional warmth. Open curtains and blinds to let the sunshine in and close them at night.

Later: Enlist the help of an energy auditor or HVAC specialist to test for duct leakage and ensure your whole system is balanced and running efficiently.

Make bright moves with your lights.

Now: The obvious first step is to make sure lights are turned off when they're not in use. You can do this manually or employ one of many automated strategies. If you're still using incandescent bulbs, you could switch the five most-used bulbs to LEDs and save about \$75 per year. LEDs last much longer and use about one-fourth as much energy. Prices on LED bulbs have decreased in the past few years and you can save more if you buy them in packs.

Later: Over time, plan to replace all your old incandescent bulbs and consider smart lighting options that can be programmed to turn off when a room is not in use.

Eliminate drafts.

Now: Look carefully around your home for signs of air leaks. If you have a gap under an exterior door, you can block it with a towel or better yet, install some weather stripping. Make sure windows are sealed with caulk and you can also seal areas around plumbing and wiring penetrations.

Later: Have an energy auditor do a blower door test, which is the best to identify all air leaks.

Fiegen Elected to SPP Leadership Spot

South Dakota Public Utilities Commissioner Kristie Fiegen was elected to serve as vice president of the Southwest Power Pool's Regional State Committee at the group's meeting in Little Rock, Arkansas, in November.

Southwest Power Pool is a regional transmission organization that partners with member companies to manage the power grid, facilitate the wholesale purchase and sale of electricity and plan upgrades to transmission networks in Arkansas, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming. Through these partnerships, SPP helps ensure the reliable supply of power, develop adequate transmission infrastructure and lower wholesale electricity prices.

The Regional State Committee is tasked with overseeing the fulfillment of the on-target, customer-driven goals of SPP as it provides bulk transmission, reliability and market services to transmission companies, utilities and end-use customers in the region. A member of each state's regulatory commission sits on this committee to provide input on matters of regional importance like recommending cost allocation policies that determine the amount electricity customers pay for the cost of building and operating transmission lines that cross several states in the SPP region.

"I am honored to be a part of the Regional State Committee," said Fiegen. "We are moving through a period of rapid change in the electrical supply industry. Given the value and cost of electricity in our daily lives, it's important for less populous states to have their voices heard as we navigate these changes. This leadership role allows me the opportunity to represent South Dakota's interests and ensure South Dakota consumers receive reliable and affordable electricity," she stated.

Fiegen is familiar with holding a leadership role on the committee having previously served as vice president and secretary.

Fiegen began serving on the PUC in August 2011 when Gov. Dennis Daugaard appointed her to fill a vacancy on the commission. She was elected to her first full, six-year term in November 2012 and re-elected in November 2018. Fiegen is a member of the National Association of Regulatory Utility Commissioners' Committee on Gas and Subcommittee on Pipeline Safety, and serves on the Gas Technology Institute's Public Interest Advisory Committee.

South Dakota
Public Utilities
Commissioner

FEMA Can Assist With Furnaces, Wells and Septic Systems

As the temperatures drop, the furnace becomes the most important appliance in the home. South Dakotans who had a furnace damaged by the severe storms, tornadoes and flooding between Sept. 9-26, should contact FEMA, even if they have already made repairs or purchased a replacement. FEMA can also help with wells and septic systems impacted by the disaster.

There are several ways to register:

- Go online to DisasterAssistance.gov or DisasterAssistance.gov/es (for Spanish).
- Call the disaster assistance helpline at 800-621-FEMA (3362) or 800-462-7585 (TTY). Lines are open daily from 7 a.m. to 11 p.m. Help is available in most languages.
- At a Disaster Recovery Center. Visit www.fema.gov/DRC or call the helpline for a listing of open locations.

FEMA may pay up to the actual cost of the receipt or estimate for furnaces, wells and septic systems. If you have repaired or replaced the furnace, FEMA may provide assistance when valid estimates or receipts are submitted. If you have additional questions, contact the disaster assistance helpline number above or visit a disaster recovery center.

Individuals in Brookings, Charles Mix, Davison, Hanson, Hutchinson, Lake, Lincoln, McCook, Minnehaha, Moody and Yankton counties and the Flandreau and Yankton Indian Reservations are eligible to register for assistance.

95%
say their co-op
is providing
reliable service.

Electric cooperatives are offering more than \$100,000 in scholarships for area students.

COLLEGE AHEAD?

Electric Cooperatives Offer Scholarships to Fuel College, Technical School Aspirations

Brenda Kleinjan

editor@sdrea.coop

For more than 30 years, South Dakota's electric cooperatives have been helping fund the continuing education dreams of students planning to attend four-year colleges or technical schools.

Over the decades, the scholarships have funded students on their way to careers in education, medicine, government, energy and everything in between.

Through the Basin Electric Power Cooperative Scholarship Program, each cooperative that is a Basin Electric member cooperative awards a \$1,000 scholarship to the dependent of a co-op member. Additional scholarships through the program are available to the dependents of co-op employees.

Several cooperatives offer scholarships to individuals to become electric line workers or electricians. These scholarships, in addition to those awarded by the South Dakota Rural Electric Line Superintendents Association, amount to more than \$10,000.

But, the majority of scholarship money available from the region's electric cooperatives are not tied to a specific program of study.

A study released this summer by WalletHub.com found that South Dakota has the highest rate of student loan debt of any state in the country while Minnesota finished sixth on the list.

The study, performed by consumer finance website WalletHub.com, had researchers analyze 12 different measures of indebtedness, including average student debt, number of students with debt, and unemployment rate.

South Dakota had the highest proportion of students with debt, and was fourth highest when it

came to percentage of student loan borrowers over age 50.

Some of the scholarships offered by electric cooperatives require that students be in high school, while other scholarships are designed for students that may be returning to school.

Additionally,

students selected to represent their local electric cooperative on the Rural Electric Youth Tour to Washington, D.C., are eligible for a \$10,000 Glenn English Foundation Scholarship. Students can apply for the undergraduate scholarship once they have completed one semester of college or technical school.

Deadlines for local scholarships vary, so check with your local electric cooperative for details.

South Dakota led the nation in student loan debt, according to a national study.

Of the scholarships being offered by electric cooperatives, more than \$10,000 is dedicated to students seeking energy-related careers.

Future Engineer?

Nationwide Scholarship Available

Since its inception three years ago, the Glenn English National Cooperative Leadership Foundation Scholarship Committee has awarded almost \$10,000 in scholarships to individuals pursuing a career in engineering.

This annual opportunity would not be possible without the foresight and generous contributions of the IEEE: Rural Electric Power Committee (REPC). Together, we hope to support future engineers with an interest and passion for defining and solving the electric utility challenges of the future, specifically in the rural parts of America.

Dates & Deadlines:

- Applications will be accepted starting on Dec. 14, 2019.
- The deadline for application submission is 11:59 p.m. EST on May 15, 2020.
- Winners are selected by a scholarship committee and announced after the National Rural Electric Cooperative Association summer board meeting in Mid-July, 2020.
- Awards are distributed in August/September, 2020.

Eligibility Requirements

- Must be a US Citizen
- Applicant must be enrolled in an ABET, four-year program of electrical engineering or electrical engineering technology, and have at least a 'B' average in major subjects.
- Applicant must be enrolled as a full-time student.
- Applicant must have already received academic credits equal to at least one year of college.

Essay Requirement Information

- To be considered for the Engineers of the Future Scholarship, you must submit an essay using the following requirements as your guide:
 - Essays need to be between 1,000 and 1,500 words.
 - Essays must describe, in detail, plans to pursue a career as an electrical engineer, with an emphasis in electric power, in an electrical utility serving a rural area.
 - Essays must demonstrate knowledge of the unique challenges facing the electric industry in Rural America and describe how you might address these issues as an engineer.

The Cooperative Difference

Moreau-Grand Electric Cooperative Returns More Than \$300,000 in Capital Credits to Members

Credit on My Bill? Yes, that is the Cooperative Difference!

Unlike other electric utilities, Moreau-Grand Electric exists to make sure your needs are always met, not to make a profit. As a member-owner, you share in the margins in the form of capital credit refunds. The cooperative works hard every day to keep your rates as low as possible. But it's sure nice to know that when there are credits, they go back to you.

How much has been returned to its members since the founding of the cooperative in 1946?

Including this year's capital credit refund, members have received **\$8.3 million**.

How much is the 2019 capital credit refund?

The general retirement approved by the board will be \$300,000 this year for members who have capital credits in 1992 plus a

percentage from 1993-2018 will be applied to all current rate payers. This will be applied to your billing statement received in December. In addition to general retirement, estate capital credits paid out thus far through November is more than \$90,000.

How is the amount given to each member decided?

These credits are based on the amount and cost of electricity each member purchased during the year or years being retired.

Why aren't the allocations paid out all at one time?

One of the basic cooperative principals is that members participate in the financial well-being of the cooperative through their economic participation. Members are the owners of the cooperative and the cooperative uses payments received from members to build and maintain the reliability of the electric system. When finances permit, margins are periodically returned to the member.

Youth Opportunities

Moreau-Grand Electric believes that by sponsoring youth programs we are investing in tomorrow's leaders. You can help by encouraging future leaders to apply. Learn more about our member programs and download applications from www.mge.coop.

Need Cash for College?

A \$1,000 scholarship is provided by Moreau-Grand Electric and Basin Electric Power Cooperative. The scholarship program recognizes and encourages academic and community achievements of students in the region. It is considered an investment in the economic future of America.

The scholarship is available to area seniors and students who are currently attending or planning to attend a college, a university or a technical school. Applications are available

from guidance counselors at area high schools, Moreau-Grand Electric Cooperative offices in Timber Lake and Eagle Butte or may be downloaded from www.mge.coop.

The deadline is Jan. 20, 2020.

Resource Conservation Scholarship

Each year the Touchstone Energy® Cooperatives of South Dakota partner with the South Dakota Department of Agriculture, Resource Conservation and Forestry Division to sponsor \$2,300 in scholarships. Any South Dakota student in grades 9-12 is eligible to enter. This includes public, private and home-school students.

Applications are available from guidance counselors at area high schools, Moreau-Grand Electric Co-op offices in Timber Lake and Eagle Butte or may be downloaded from www.mge.coop. The deadline is March 28, 2020.

Technical Schools, Colleges Ready the Workforce

Variety of programs offered for in-demand careers

Brenda Kleinjan

editor@sdrea.coop

Each year, more than 10,000 people head to area technical schools and technical colleges to develop the skills employers in the region are seeking.

South Dakota's four technical schools – Lake Area Technical Institute in Watertown, Mitchell Technical Institute in Mitchell, Southeast Technical Institute in Sioux Falls and Western Dakota Technical Institute in Rapid City – have been serving students in the region for the last century, with three of the schools starting in 1968 and the fourth starting in 1969. Neighboring states have similar offerings at schools within easy driving distance of South Dakota.

This fall, Lake Area's campus at Watertown, S.D., was at capacity with 2,228 students. The school notes that students have a 99 percent placement rate after graduation.

Nearly 1,200 students attend Mitchell Tech which notes that 99 percent of its graduates find employment or continue their education. The school also notes that 82 percent of its grads stay in the Rushmore State.

For Southeast Tech's 2017-2018 graduates, the school said that 95 percent are employed or continuing their education, with 95 percent of those employed were employed in a field related to their Southeast Tech program.

Western Dakota Tech is the only technical college serving the western half of the state. It notes that 96 percent of its most recent graduates are working, continuing their education or enlisting in the military.

Among the programs offered at Mitchell Technical Institute in Mitchell, S.D., is South Dakota's only power line program for training future line workers.

National Leaders

Technical colleges across the region have been recognized for excellence in their field.

The \$1 million Aspen Prize for Community College Excellence, awarded every two years, is the nation's signature recognition of high achievement and performance among America's community colleges. With a singular focus on student success, the Prize highlights institutions with outstanding achievements in four areas: student learning, certificate and degree completion, employment and earnings, and high-levels of access and success for students of color and low-income students.

In November, the Aspen Institute College Excellence Program named the nation's top 150 community colleges eligible to compete for the \$1 million Aspen Prize for Community College Excellence, the nation's signature recognition of high achievement and performance among America's community colleges.

Eleven schools based in Minnesota, Nebraska, North Dakota and South Dakota made the list:

Minnesota West Community & Technical College

Technical education needs in southwestern Minnesota have been served by the campuses of Minnesota West Community and Technical College for more than 75 years.

The college has five campuses: Canby, Granite Falls, Jackson, Pipestone and Worthington in addition to centers in Luverne and Marshall.

The college offers a wide array of ever-changing programs and services, including career and transfer preparation, industry and customized training, community education, athletics, performing arts, student organizations, clubs, and personal enrichment. The school provides students opportunities to earn an associate degree, diploma or certificate in more than 60 disciplines, plus convenient campus locations throughout southwest Minnesota as well as online learning opportunities.

The school boasts of its small class sizes, personalized attention and focused, hands-on learning. Its technical programs provide students with the practical skills to begin successful careers in a variety of industries immediately upon graduation. Liberal arts programs at Minnesota West are a great starting point for careers or further study in numerous fields. Credits earned in our associate of arts and associate of science programs are designed for seamless transfer to other Minnesota State institutions.

Lake Area Tech in Watertown was nationally recognized as a top community college.

■ MINNESOTA

- Alexandria Technical and Community College
- Minnesota State Community and Technical College
- Northland Community and Technical College
- Ridgewater College
- Saint Paul College

■ NEBRASKA

- Central Community College
- Northeast Community College

■ NORTH DAKOTA

- Bismarck State College
- North Dakota State College of Science

■ SOUTH DAKOTA

- Mitchell Technical Institute
- Southeast Technical Institute

Based on strong and improving student outcomes – including in learning, completion rates, employment rates and earnings, and equity – 15 percent of community colleges nationwide have been invited to apply for the Aspen Prize. Data show that over the last two years, student retention, graduation rates, and degree completion have improved at the top tier of 150 Aspen Prize-eligible colleges.

The 150 community colleges named in November 2019 as eligible to compete for the 2021 Prize were selected from a pool of nearly 1,000 public two-year colleges nationwide using publicly available data on student outcomes. Located in 39 states in urban, rural, and suburban areas,

serving as few as 500 students and as many as 75,000 students, these colleges represent the diversity and depth of the community college sector.

The top 10 finalists for the 2021 Aspen Prize will be named in May 2020. The Aspen Institute will then conduct site visits to each of the finalists and collect additional quantitative data, including employment and earnings data. A distinguished jury will make award decisions in

Lake Area Technical School in Watertown, S.D., was the 2017 Aspen Prize winner, the nation's signature recognition of high achievement and performance among America's community colleges.

spring 2021.

Lake Area Technical School in Watertown, South Dakota, was the 2017 Aspen Prize winner. In the 2017-2018 school year, Minnesota West was one of 150 top community colleges nationwide competing for the Aspen Prize while MTI was a 2019 Top 10 finalist.

When the South Dakota Legislature convenes in January, it will transform several ideas into legislative bills, some of which will become state law.

WHERE DOES A BILL COME FROM

Legislative Research Council

<http://sdlegislature.gov>

When state legislators are in Pierre every year for the annual legislative session, the majority of their time is spent discussing ideas for changes in state law. Ideas vary from changing only a word or two of a current law, an entire section of law, getting rid of a current state law, or creating a new law.

All of the ideas, regardless of their size or scope, must be presented to the Legislature in the form of bills. Bills are simply the ideas recorded on paper in a prescribed format.

Only legislators and legislative committees may present or introduce bills to the Legislature. However, ideas for bills come from a multitude of sources. First, legislators have their own ideas for bills stemming from their expertise in certain fields, experiences they have had, or observations they have made. Special interest groups are another source of ideas. Members of these groups often ask legislators to sponsor bills promoting their interests.

Many ideas for bills come from government agencies. Each year several bills are introduced at the request of the Governor or on behalf of a department in state government. Those who work closely with state law are often able to

recommend ways to improve it.

Finally, ideas for bills come from those individuals represented by the legislators, the constituents who live in their districts. The next step is to put an idea into the form of a bill. Anyone can draft a bill, but the rules of the Legislature require that all bills be in the proper form and style.

A legislator wishing to introduce a bill generally brings the idea or a draft of the proposed bill to the Legislative Research Council, where staff members will either draft the bill or make final preparations on the bill drafted by others.

The legislator who begins to move the bill through the legislative process is known as the prime sponsor. The prime sponsor may introduce the bill independently or seek other legislators to act as co-sponsors of the bill. Senate bills have senators as prime sponsors, and House bills have house members as prime sponsors. However, members of either house may co-sponsor any bill.

Bills may not be introduced until the first day of a legislative session. However, those elected to serve in the upcoming Legislature may pre-file bills with the Legislative Research Council, up to 30 days in advance of the first legislative day. Interim committees may pre-file legislation under the names of individual legislators who served on the committee.

The rules require executive agencies to pre-file any legislation they wish to have considered. A bill in proper form consists of three main parts: the title, the enacting clause, and the body.

- The title gives the reader a brief summary of the subject of the bill. The SD Constitution dictates that bills embrace only one subject, and that subject must be expressed in the title.
- The enacting clause, “BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF SOUTH DAKOTA,” is also required by the SD Constitution and indicates that everything listed below it is to become the law of the state.
- The body is the remainder of the bill, the part that will actually become law, if passed. It is divided into sections to make it easier to read and to reference.

In addition to the three main parts, a bill also includes a list of sponsors and a number. The name of the prime sponsor always appears first on the bill and then the co-sponsors are alphabetically listed. If a committee is sponsoring a bill, then only the name of the committee is listed. A number is assigned to the bill upon introduction and is used to identify the bill as it works its way through the process.

During session, legislators spend a majority of their time discussing bills, but bills are not the only proposals that come before the Legislature. Legislators may introduce commemorations and resolutions. Commemorations express legislative recognition and listed below are four types of resolutions that may be introduced:

- A simple resolution is unique in that it pertains to and is acted on by only one house. It is used primarily to express an opinion, gratitude, or condolences, or to make a request of the other house.
- A concurrent resolution expresses an opinion of the Legislature, but it has no force of law. Often it is used to persuade Congress to act in a certain way or to make a request of the Governor or a government agency.
- A joint resolution is, by law, used to propose changes to the SD Constitution and submit them to the voters at the next election. It is also used to ratify or propose amendments to the United States Constitution. Unlike the previous two types of resolutions, a joint resolution only contains matters of legislation.
- A resolution of disapproval allows the Legislature to disapprove of any reorganization of the executive branch done by the Governor during the preceding year. It is the newest type of resolution and used less frequently than the others.

How An Idea Becomes Law in South Dakota

Idea

- A bill is simply an idea that someone would like to see become law.
- It could be anything from the penalty for committing a crime to the amount of money that can be spent on a state program.
- The idea can come from anyone, but only a State Representative or State Senator can take the idea and guide it to final passage through the State Legislature.

Drafting

- The drafting of the idea into a bill is done by the Legislative Research Council, the permanent, non-partisan staff of the Legislature.
- A bill may be filed by any member of the House or Senate, and generally more than one legislator will sponsor a bill. The legislator whose name appears first on the bill is the “prime sponsor.”

Introduction

- A bill is given to the Chief Clerk of the House or the Secretary of the Senate and is assigned a number. If the bill is sponsored by a Senator, it is a Senate Bill. If the bill is sponsored by a Representative, it is a House Bill.
- The bill is given a First Reading in the “House of Origin.” The “House of Origin” is the chamber that sponsored the bill.
- At a First Reading the bill’s number and title are read aloud.
- The Senate President Pro Tempore or Speaker of the House then assigns the bill to a committee.

Committee

- A committee’s responsibility is to examine a bill carefully, take testimony for and against the bill, and decide what to do with the bill.
- The committee has the following options:
 - Send the bill to the floor with a “Do Pass” recommendation,
 - Amend
 - “Table” the bill, which kills the bill, unless the full body orders the committee to send the bill to the floor (“Smoke-Out”), or
 - Defer the bill to the day after the last Legislative Day, which also kills the bill.

Debate

- If a bill reaches the floor, it is debated and voted on by the body.
- If it passes, the bill is sent to the other body, where it goes through the same introduction and committee processes.

Law

- If a bill passes both the House and Senate, it is sent to the Governor.
- If signed by the Governor, the bill becomes law.
- If vetoed by the Governor, the Legislature has an opportunity to decide whether to override or uphold the veto.
- If the Legislature succeeds in overriding the veto, the bill becomes law.
